TUBEROUS SWORD FERN *Nephrolepis cordifolia*

II

PRAXELIS *Praxelis clematidea*

II

BALSAM APPLE *Momordica balsaminata*

II

CASTORBEAN *Ricinus communis*

II

GREEN SHRIMP PLANT *Ruellia blechum*

II

Increasingly found in Lake County:
It is the larval food source for the
beautiful Malachite butterfly normally
found in Central and Northern South
America.

Know Before You Grow

Removal of invasive species requires persistence

Properly Dispose of Invasive Plant Material

- Bag all flowers/seeds/roots at site in heavy plastic bag
- Tie tightly
- “Solarize” for several weeks
- Dispose of in regular trash
- Do not compost or put in yard waste
